Flarus Translation Agency offers services of professional linguists - translators, interpreters and editors of all major European and Asian languages.

Why our prices are the lowest? We don't strive to gain maximum surplus on every translation. Our surplus is rather low. But we work synergetically and quickly. All the working processes, except that of translation as it is, are computerized. We simply execute many orders. Due to the high degree of automation of management processes, designed to enhance the efficiency of our managers' and editors' work, it takes an average of 15 minutes to provide a quote - from the moment you submit a document until you receive the precise account of its cost and execution time.

Scale-up factors

Scale-up factors are defined and fixed only after the source text review. Terms of scale-up factors application: translation rate of more than 6 (six) pages a day; complicated or highly specialized subject of translation.

Discount

We provide additional beneficial conditions for our regular customers and offer various discounts for translations. For example, by ordering a 50-page translation, you are getting a 5% discount off the translation cost. If your text exceeds 100 pages, you will get a 10% discount. It's no secret that favorable word-of-mouth recommendations attract new customers. On January 01, 2011 we launched a new Let Your Partners Have a Discount at Our Expense promotion, which is currently running. Each new customer choosing Flarus Translation Agency at your recommendation will get a 10% discount off the cost of the first order.

Urgent translation

Urgent order is a translation that is to be completed and delivered on the same day, or the average speed of its execution exceeds 6 standard pages a day. Urgent translation, like any other, is performed by human people, whose abilities, professional as they are, are confined to certain limits. Average translation speed of

an expert translator is 6-7 pages per one standard working day. 10 pages a day is a speed of a highly proficient specialist. 15-20 for one person means working at excessive capacity. When it is necessary to complete a fair-sized translation at an early date, we divide the original text into smaller parts and distribute them between a pre-selected group of translators. Through several years of such experience at "Flarus" Translation Agency, we have already selected a number of groups specializing in different fields, such as engineering or law, and, if necessary, a new team can be selected. Thus, the maximum translation speed provided is 12-16 pages per day by one executor, and up to 40-60 pages per day by a group of 4-6 executors.

Translation Services Contract

Please, ask our managers for the draft of the standard contract for translation services. You can do it by e-mail, attaching the requisites of the company or person that will act as the customer. If you have any questions, please feel free to ask us by phone or e-mail.

Order

Please, be welcome to request the services of the "Flarus" Translation Agency - we will be happy to offer our best qualified translators and editors of all major languages of the world, as well as all kinds of related linguistic services.

Please send your letter to our e-mail with an attached file for translation and indicate your contact data. After receiving your letter with an attachment our manager will calculate a precise cost of work and will contact you within 10-15 minutes.
